**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/25/10 has been entered.

***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The limitation of "said reversed segment being substantially shorter in length than the length of said elongated substantially straight piece" appears to have support in the drawings but does not have antecedent basis in the written description.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-12,14-17,26,27,31,32 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

New independent claim 34 recites the following limitation: "said single arcuate shaped section formed as a single curvature but with different contiguous radii of curvature". However, this configuration is vague and indefinite because the latter portion of the limitation (the different contiguous radii of curvature) contradicts the earlier limitation of "a single curvature". A single curvature implies that the upper jaw only has one curve. Having multiple contiguous radii of curvature teaches away from a single curvature.

Claim 34 also recites the following limitation: "said single arcuate shaped section including a first arcuate shaped portion contiguous with said straight section and a second arcuate shaped portion contiguous with said first arcuate shaped portion disposed at an opposite end of said first arcuate shaped portion to said straight section". Again, the limitation contradicts itself because it recites the clip having a "single" arcuate shaped portion, but then further defines it having a "first" and "second" arcuate shaped portions. The latter limitation clearly indicates that the clip does not have a "single" arcuate shaped portion. This limitation renders the claim vague and indefinite.

The remaining claims are also rejected under 112, second paragraph for being dependent upon the rejected independent claim.

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 2-12,14-17,26,27,31,32 and 34 have been considered but are moot in view of the new ground(s) of rejection.
